

BergaMASK®

Made in Italy

DISPOSABLE GENERIC FILTER

CE 2001/95

* All the data shown below relate to tests performed on the complete BergaMASK mask (semi-facial silicone riser with filter) and not only on the filter housed

* The BergaMASK silicone semi-facial upright can house all types of BergaMASK filters

Characteristics:

- Non-woven water-repellent fabric made using Spunbonded technology.
- Composition: 100% Polypropylene
- It complies with the guideline 2002/72/EC
- It complies with the guideline CE 2001/95

Usage:

Water repellent filter to contain the droplet effect: prevents "droplets of saliva" from reaching other people by sneezing, coughing or simply talking. The filter is characterized by excellent breathability. The filter acts both at the entrance and at the exit. The filter has not been tested for dust filtration or bacterial filtration efficiency.

Some examples of use: sports, walking, shopping, meeting with relatives or friends, working environments in which no toxic or fibrogenic dusts and aerosols are expected or direct contact with patients (offices, shops, ...).

* All BergaMASK filters are available in packs of 30 pieces each
